

Consumer Experience Network

Built for Everyone. Web3 made it simple.

Unlocking Business Potentials

2025

Driven by Reality

Focus Problems

Chaotic Experiences and Trust Gap

Shared experiences lack context, clarity, relevance and specificity.

Unreliable and Fake Reviews

Users struggle to find genuine, trustworthy and information they need.

Rewardless Contributions

Existing platforms fail to motivate valuable user engagement.

Value Without Returns

Users receive no economic benefit from their valuable content.

Invisible Expertise

Real user expertise remains hidden and undiscoverable.

Poor Data, Poor AI

Unstructured data diminishes AI accuracy and effectiveness.

Combined Strengths, One Perfect Blend

Compact Solutions

Structured & Contextual Experience Sharing

Clearly structured **consumer experience segments**—purchase, pricing, usage, consumption, disposal—allow users to share context-driven insights effortlessly.

NFT Badges & AI Content Validation

NFT badges earned through **achievement ladders** verify expertise, while AI ensures content quality and interactions.

Economic Rewards & Social Recognition

Experiences based NFT badges provide **social prestige** and visible recognition— badge owners directly receive token-based incentives.

How it works?

Turn **Experiences** into NFT Badges for Incentives & Social Visibility.

STEP - 1

Experience Sharing & Contribution

Users share structured experiences, create collections of owned or tested products and services, offer personalized tips and recommendations, and provide 1:1 expert support.

STEP - 2

Community Engagement

Shared content drives meaningful interactions, discussions, ratings and feedbacks.

STEP - 3

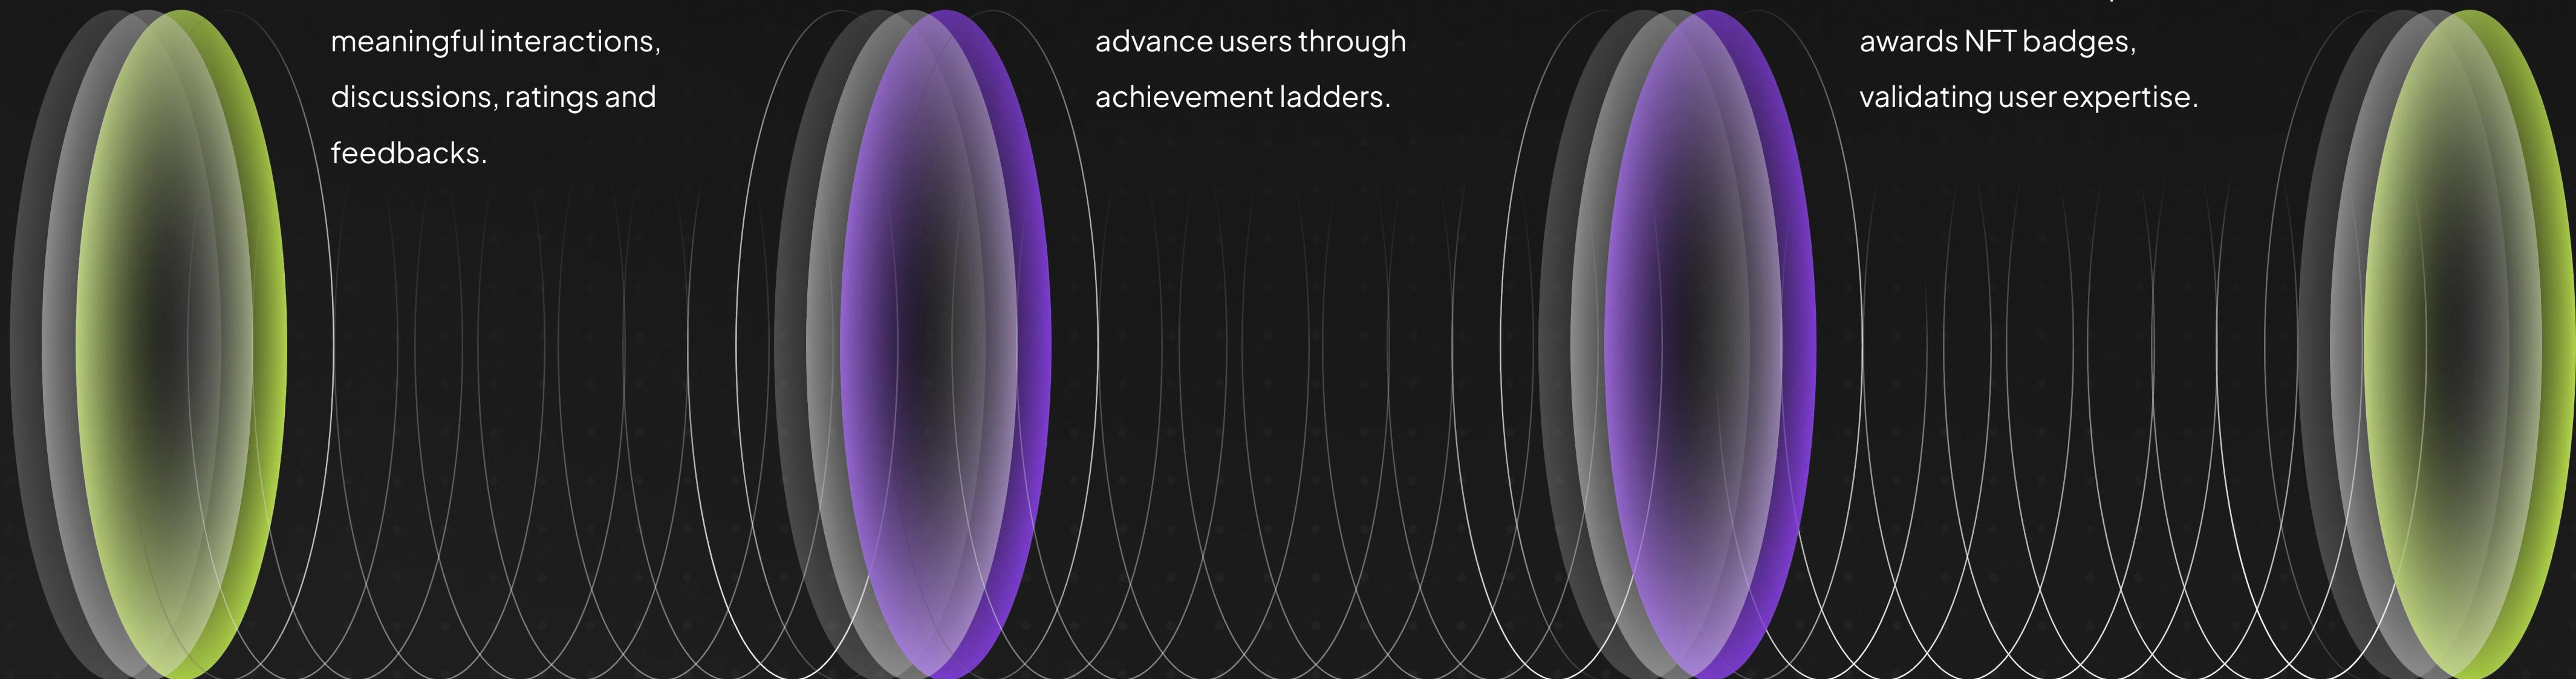

Achievement Progression

Valuable contributions advance users through achievement ladders.

STEP - 4

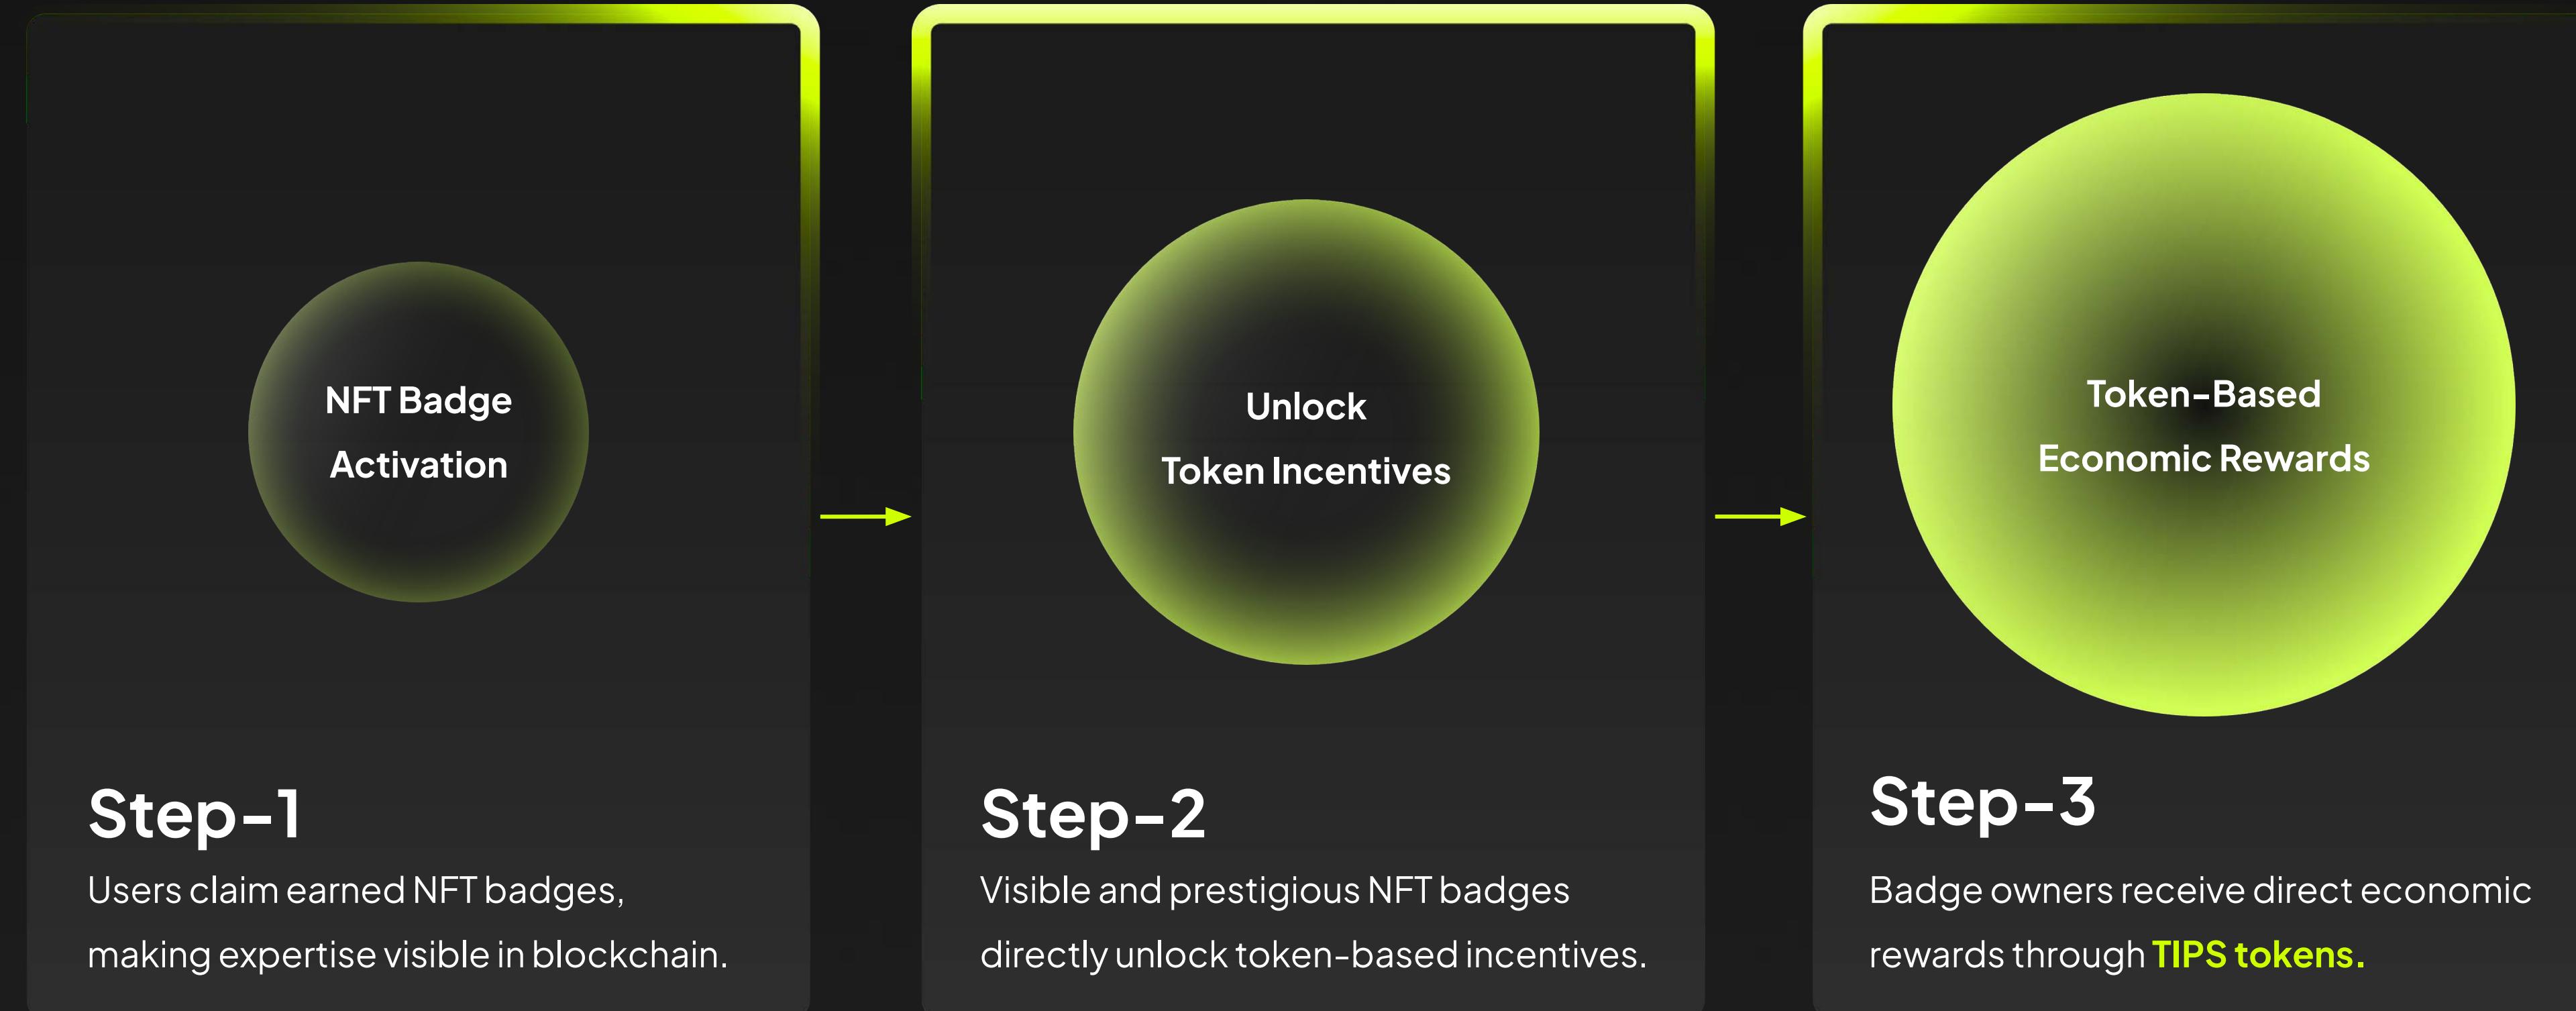

Expertise Recognized with NFT Badges

Achievement completion awards NFT badges, validating user expertise.

Turn NFT Badges into Token for Rewards and Benefits.

How it works?

Product

Easy-to-use, Powerful, Modular, User-Centric

1. Socialized Experience Features

- Directory-based Flow

Upcoming Opportunities

Brands

Future Expansion: B2B Potential

User-First Today, Brands Tomorrow

Recognizing that successful brand engagement requires an established, active user community, Tipbox strategically prioritizes user growth first, breaking the typical user-brand deadlock.

Verified User Insights - Reliable user insights create valuable, targeted market data for brands.

Segmented Experience: Clear user segments enable precise brand targeting and **marketing**.

AI-Powered Brand Interactions: AI-driven tools to optimize future brand-user communication.

Looking Forward

Clear Vision, Defined Milestones, Measurable Success
for Potential Outcomes

From a powerful niche community to a transformative global platform—Tipbox is positioned to redefine user experiences and set new standards for Web3 mass adoption, **whatever the scenario**.

Best-Case Scenario

Becomes a **leading** Web3 experience platform with **5 million+ active users** globally, generating over \$25M+ annual revenue through NFTs, tokens, and premium features.

Realistic Success Scenario

Establishes a highly engaged community with **500K+ active users** across selected markets, generating steady annual revenue of **\$2.5M+** from strategic partnerships, NFTs, and premium plans.

Worst-Case Scenario

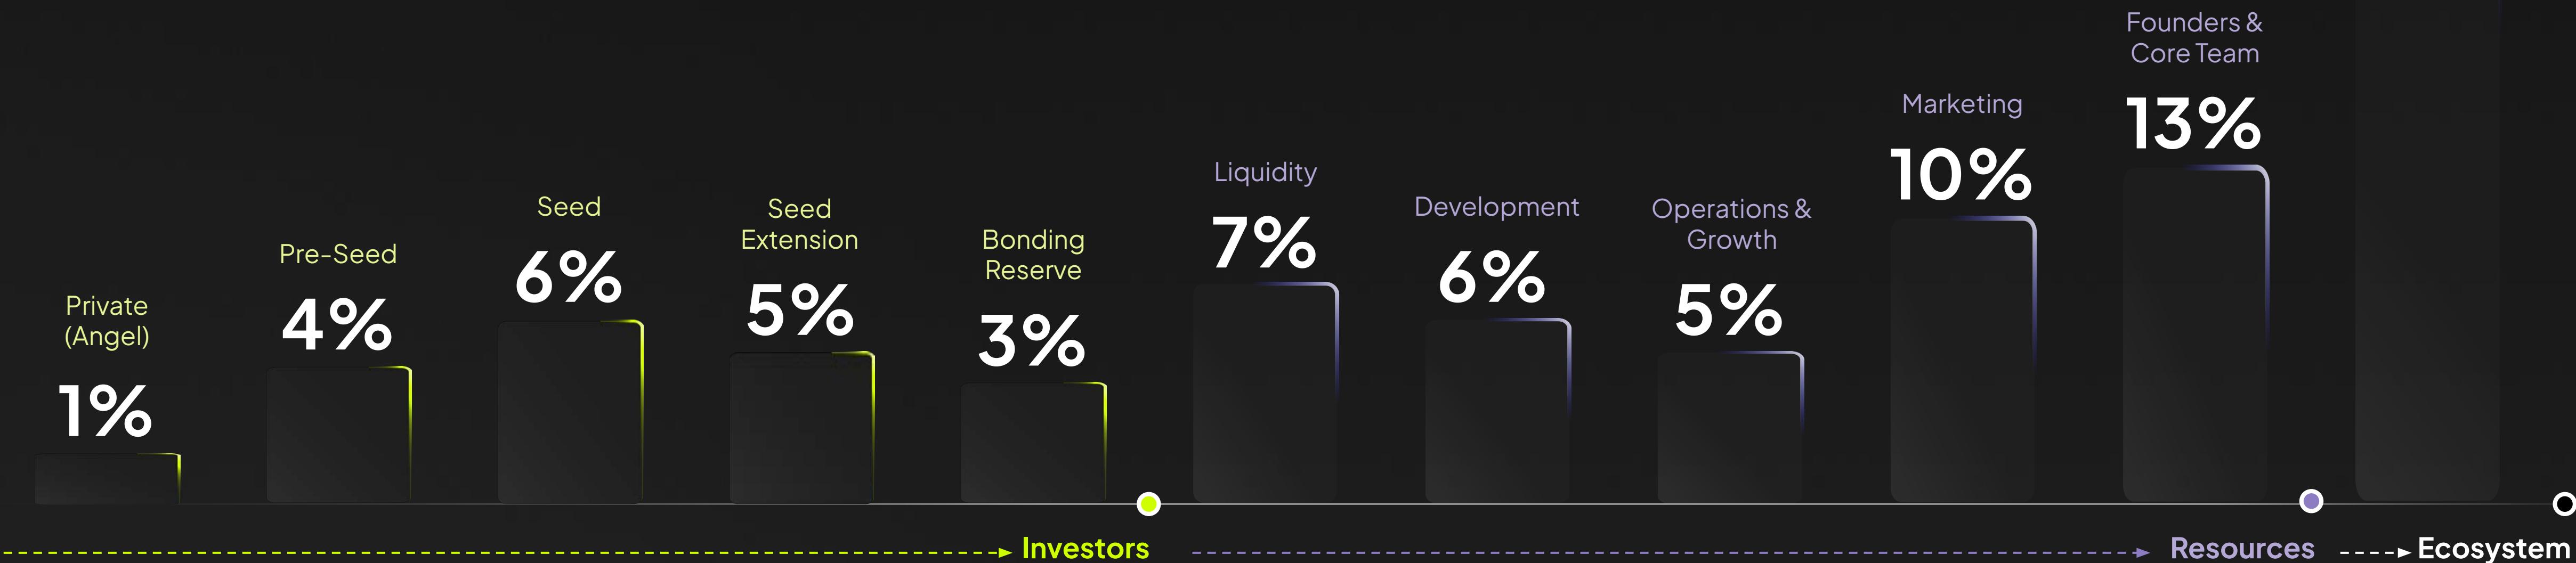

Remains a profitable niche community with **100,000 highly engaged members** (e.g., *female users in cosmetics*), providing reliable, blockchain-verified product insights and exclusive community experience.

Tokenomics

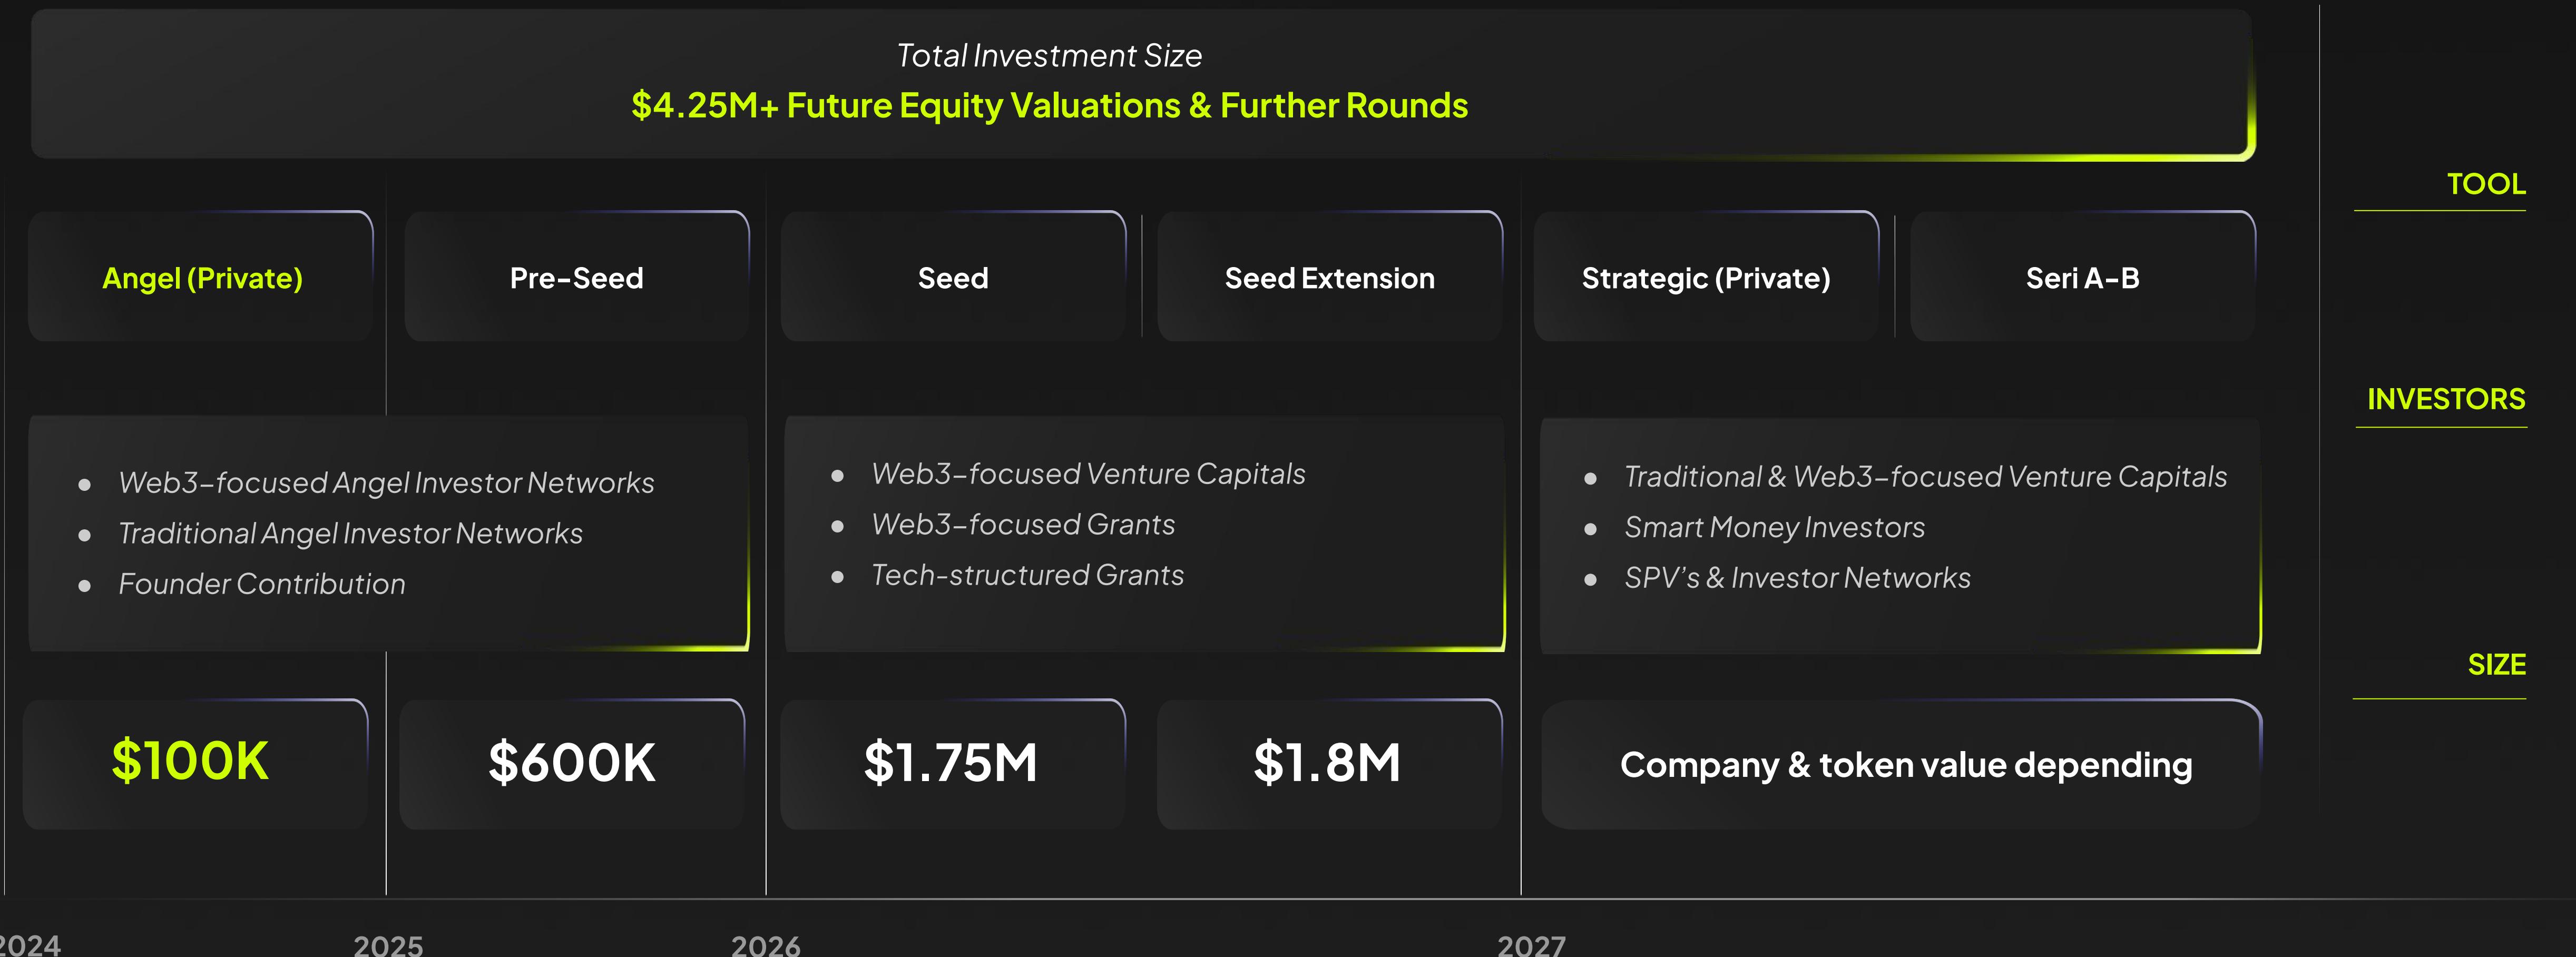

Transparent Allocation, Sustainable Growth

*The majority of tokens are allocated to the **Incentives & Rewards** fund, directly supporting user engagement, product adoption and ecosystem growth.

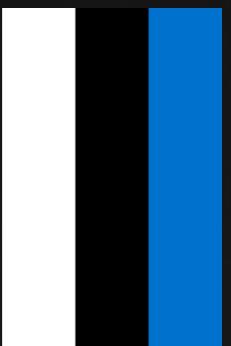

Traction

Investment Plan Backed by Clear Milestones

Company and Founding Team

Experienced Team, Global Vision

 **Tipbox** is strategically establishing its headquarters in **Estonia** following alignment with key investors and advisors, positioning itself ideally to lead global Web3 consumer innovation.
